

Ananya Aggarwal

Dharamshala, Himachal Pradesh | ananya20aggarwal@gmail.com |

EDUCATION

MCM DAV College kangra, Himachal Pradesh

Degree

2019-22

B.C.A 8.22 CGPA

CGC Jhanjeri, Mohali, Punjab

Degree

2022-2024

M.C.A 7.72 CGPA

SKILLS ACQUIRED

Programming Languages and technologies: Java, Spring Boot, Angular, Python, SQL, HTML, CSS ,AWS and Linux

EXPERIENCE

PearlThoughts

April- present

Devops Engineer Intern

Strapi deployment using terraform

- Set up and customized the Strapi CMS locally, including content type creation and admin panel configuration.
- Documented the setup in detail and published to GitHub with a structured and beginner-friendly README
- Deployed the Strapi app on AWS EC2 using Terraform with automated infrastructure provisioning (EC2, security groups, and user data scripting).
- Gained hands-on experience with Infrastructure as Code (IaC) and cloud automation.

Strapi Deployment on AWS ECS using Docker, Terraform & GitHub Actions

- Containerized a backend application using Docker, and deployed it to Amazon ECS (Fargate) for scalable container orchestration.
- Set up a CI/CD pipeline using GitHub Actions to automate build and deployment:
 - Build Docker image
 - Push to Amazon ECR
 - Deploy to ECS using Terraform infrastructure
- Defined infrastructure with Terraform, including ECS cluster, task definitions, ALB, VPC, subnets, and IAM roles.
- configured health checks and load balancer routing to ensure zero-downtime deployment.
- Hosted the backend API securely and monitored ECS service logs to verify container health and performance.
- **Tools & Technologies:** Docker, AWS ECS Fargate, Amazon ECR, GitHub Actions, Terraform, Load Balancer, CI/CD, Git

ACADEMIC PROJECTS

Student Management System with dashboard

- Developed a Restful API with CRUD operations for student data collection using Spring Boot.
- Implemented role-based login.
- Designed a normalized database schema for the management system.
- Developed the front-end using Angular for a responsive user interface and an interactive dashboard using angular highcharts.
- Implemented a layered architecture with robust exception handling (@ControllerAdvice) and centralized logging using SLF4J/Logback.
- Utilized Spring Data JPA for data persistence and MySQL for production storage, with database for in-memory testing.

Machine Learning Model Development on AWS SageMaker

- Established IAM user to ensure secure access to AWS services
- Created and managed an S3 bucket for efficient storage of project dataset
- Utilized the SageMaker instance and developed and trained a machine learning model using AWS SageMaker..

CERTIFICATIONS

- **Coursera** : Java Programming: Solving problems with Software.
- Completed a comprehensive Java Bootcamp organized by CCPD at Chandigarh Group of Colleges, Jhanjeri, Mohali.
- **Published review paper:** "A Review on Efficiently Allocating Resources in a Dynamic Cloud Environment," International Journal of Engineering Research & Technology (IJERT), April 2024, DOI: 10.17577/IJERTCONV12IS03004
